OUR COMPANY

Australian Turntables is a world renowned company specialising in rotational movement systems.

We provide turntables to a wide range of industries from construction sites and commercial parking, to rotating displays and residential driveways, making life easier by maximising space and increasing efficiency in the safest way possible.

Our team provide straightforward, practical solutions, and support to our clients from the initial concept of a project through to completion as well as on going after installation.

OUR HISTORY

Established in 1987, Australian Turntables was founded through a willingness to adapt and simplify processes thinking to engineer smart, long lasting solutions.

We design and manufacture all of our products in Australia, and can supply solutions for any project, across any industry, anywhere in the world.

OUR VALUES

At Australian Turntables, we understand the impact and quality of your supply chain impacts the success of your project.

That's why we bring global expertise and deliver long term value with our products. We embrace challenges, and continually innovate to imagine better solutions.

We're not interested in "one and done" sales, but rather in building lasting relationships with our clients, making their life easier which is what they have come to expect.

It's simple, for us, every detail counts we work out the complexities, so you don't have to.

OUR LOCATIONS

Our innovative solutions are built to turn the world around, the Australian way.

With knowledge and experience across a range of industries, and our global distribution network, we have delivered projects to over 22 countries for some of the world's best companies.

OUR FOCUS

Our key focus is our customers' needs after all, where would we be without them?

For us, helping customers achieve the best results means also having a strong focus on improving safety, saving space, and increasing productivity.

By focusing on the specific details of our customers' needs, our team works to develop the most practical and efficient design for your space, so you can achieve the best results.

OUR CLIENTS SAY

'I have worked with Australian Turntables for over three years and can say with confidence that the products that have been supplied, installed and maintained have been of a superior standard'.

MICHAEL CARTISANO
Senior Site Manager
Lendlease

OUR QUALITY

Our products are designed and manufactured locally in Australia using the highest quality products, giving you a solution that's built to last.

We are accredited with the following Australian and international standards:

AS 4024
ISO 9001:2015
ISO 14001:2015
ISO 45001:2018

WHY AUSTRALIAN TURNABLES IS THE PERFECT SOLUTION FOR ARCHITECTS:

Australian Turntables have supplied and installed thousands of residential turntables globally, with a design that has been refined over more than 30 years.

We do this by looking for every opportunity to find smart solutions to help reduce the space required for car movements, helping you to get the best out of a project. Whether it is creating room for another carpark, space for an extra bedroom, an additional townhouse, space for a pool, more storage, or to help comply with your local government requirements. With decades of experience, helping architects, Australian Turntables have built a reputation of delivering great support and service backed up with the world's highest quality product.

FEATURES + BENEFITS

As sites become smaller and more councils enforce safer vehicle movements, the challenges of designing an efficient space that includes all the necessities becomes significantly easier with a turntable.

Our turntables can be designed specifically for solving problems like space restricted projects on busy roads or 'battle-axe' blocks, these are blocks of land behind another property that have access to the street via a long driveway, such as an 'L' shape design. Additionally, our turntables are made with the consideration for user comfort whether that be staff, residents, clients or guests using the turntable, including making extra room for a better design, or for multi purpose uses.

SAFETY

At Australian Turntables, we want you to live life looking through the windscreen, not the rear view mirror. That's why we work to inspire you by creating the most practical and straightforward solutions possible. For us, it's simple, there's only one direction, forward.

Reversing is not only less efficient, causing delays and loss of time, it can also be fraught with danger, for drivers, work sites, staff, pedestrians and cyclists. After all, life moves forward, not backwards.

Why choose backwards? Shift your perspective turn around to find the better way.

At Australian Turntables, we take safety very seriously. Our platforms are not only designed to optimise space and create efficiencies but are also focused on providing greater safety for our users by preventing accidents and high risk situations often caused by reversing manoeuvres due to lack of visibility, co-ordination, or control.

With our turntables, safety is paramount and offers these benefits:

Safety comes first

Whether you're located on a busy street or a quieter leafy suburb, the safety of your family and community is of utmost importance. At Australian Turntables, we couldn't agree more, and have designed our car turntable platforms with this in mind. Our design provides a practical space saving solution, planned with safety concerns and eliminating risky blind spots.

Practical and safe

Ever tried to reverse out, only to realise blind spots, traffic and noise add to the stress? Eliminate the difficulty of reversing and parking in tight spaces with our car turntables. Our turntables reduce the risk and danger of having to reverse onto a busy street and give you forward entry and exit. Save space and prevent potential accidents and high risk situations by installing a turntable.

Your neighbours and community will thank you

With the ease of entering and exiting in a forward direction, your neighbours will thank you. Whether it's the teen skateboarders who tear up the pavement, after school kids on push bikes, little ones running around or our four legged friends. Eliminate blind spots and the risks associated with reversing. After all, almost all accidents take place because of human distraction!

AUSTRALIAN TURNABLES

PROUDLY AUSTRALIAN MADE & OWNED

At Australian Turntables, all of our products are proudly designed and manufactured right here in Australia. This means we invest in our local community, reduce environmental costs, and, in our humble opinion, build a better product. Our turntables are the result of years of risk taking, innovation, adaptability, mateship and bloody hard work!

Australian born and Australian made, we are constantly searching for simple, straightforward, practical solutions that make your life easier and more efficient giving you more time for what really matters.

Quality assured – The Aussie Way

Safety comes first

Be it construction sites, airport parking, rotational displays, loading docks, or residential driveways, we don't compromise on quality or safety, and choose to use local products and services to manufacture our products, we also source our staff locally. Our inhouse engineers combine industrial design and engineering to produce the highest quality products. We approach challenges and complex problems with innovative solutions that are built to turn the world around, the Australian way.

The Australian Made license has been assessed in accordance to the AMAG code of practice. Licensee ID number: 13153

WHAT OUR CLIENTS SAY

 TELGRIT
MASTER BUILDERS

9th July 2020

To Whom it may Concern

Telgrit Pty Ltd has worked in Bellevue Hill and surrounding areas of Sydney as a boutique builder since 1996.

We began working with Australian Turntables in 2012 and since that time we have completed successful projects together in Bellevue Hill and the Sutherland Shire.

I have engaged Australian Turntables when necessary where the solution of a turntable allowed us to utilise the space in the most efficient manner.

Australians Turntables are both friendly and consistent in their approach in providing a reliable and Efficient service that is tailored to my needs as a builder and to the particulars of my projects. They are respectful and professional in their approach and understands the challenges of site, brief, budget, time and building and planning regulation as it applies to high end construction.

This makes for a pleasantly efficient and smoothly-run design and documentation process.

I would happily continue to endorse Australian Turntables for any future project.

If you have any queries in relation to this recommendation, please do not hesitate to contact the undersigned on 0408 297 654.
