AUSTRALIAN TURNTABLES

PROUDLY AUSTRALIAN MADE & OWNED

At Australian Turntables, all of our products are proudly designed and manufactured right here in Australia. This means we invest in our local community, reduce environmental costs, and, in our humble opinion, build a better product. Our turntables are the result of years of risk taking, innovation, adaptability, mateship and bloody hard work!

Australian born and Australian made, we are constantly searching for simple, straightforward, practical solutions that make your life easier and more efficient giving you more time for what really matters.

Quality assured – The Aussie Way

Be it construction sites, airport parking, rotational displays, loading docks, or residential driveways, we don't compromise on quality or safety, and choose to use local products and services to manufacture our products, we also source our staff locally. Our inhouse engineers combine industrial design and engineering to produce the highest quality products. We approach challenges and complex problems with innovative solutions that are built to turn the world around, the Australian way.

The Australian Made license has been assessed in accordance to the AMAG code of practice. Licensee ID number: 13153

OUR COMPANY

Australian Turntables is a world renowned company specialising in rotational movement systems.

We provide turntables to a wide range of industries from construction sites and commercial parking, to rotating displays and residential driveways, making life easier by maximising space and increasing efficiency in the safest way possible.

Our team provide straightforward, practical solutions, and support to our clients from the initial concept of a project through to completion as well as on going after installation.

OUR HISTORY

Established in 1987, Australian Turntables was founded through a willingness to adapt and simplify processes thinking to engineer smart, long lasting solutions.

We design and manufacture all of our products in Australia, and can supply solutions for any project, across any industry, anywhere in the world.

OUR VALUES

At Australian Turntables, we understand the impact and quality of your supply chain impacts the success of your project.

That's why we bring global expertise and deliver long term value with our products. We embrace challenges, and continually innovate to imagine better solutions.

We're not interested in "one and done" sales, but rather in building lasting relationships with our clients, making their life easier which is what they have come to expect.

It's simple, for us, every detail counts we work out the complexities, so you don't have to.

OUR LOCATIONS

Our innovative solutions are built to turn the world around, the Australian way.

With knowledge and experience across a range of industries, and our global distribution network, we have delivered projects to over 22 countries for some of the world's best companies.

OUR FOCUS

Our key focus is our customers' needs after all, where would we be without them?

For us, helping customers achieve the best results means also having a strong focus on improving safety, saving space, and increasing productivity.

By focusing on the specific details of our customers' needs, our team works to develop the most practical and efficient design for your space, so you can achieve the best results.

OUR INDUSTRIES

- Residential
- Showrooms
- Construction
- Revolving Restaurant / Rooms
- Mining
- Tunnelling
- Cement Plants
- Warehouse / Loading Docks
- Materials Handling
- Photo Booth
- Emergency Services
- Custom Projects
- Rotating theatre stages

OUR CLIENTS SAY

'I have worked with Australian Turntables for over three years and can say with confidence that the products that have been supplied, installed and maintained have been of a superior standard'.

MICHAEL CARTISANO
Senior Site Manager
Lendlease

OUR QUALITY

Our products are designed and manufactured locally in Australia using the highest quality products, giving you a solution that's built to last.

We are accredited with the following Australian and international standards:

AS 4024
ISO 9001: 2015
ISO 14001:2015
ISO 45001:2018

WHY AUSTRALIAN TURNTABLES

Australian Turntables can help you design the available space to maximise benefit:

Our turntables have helped hundreds of architects across the globe design loading docks and waste collection areas that work efficiently and safely while generating extra revenue opportunities for a diverse range of companies. We do this by looking for every opportunity to reduce the space required for truck movements, giving you that extra room for other services, like parking, additional retail space and storage, or to help meet your local government requirements. With over 30 year experience of working with architects, Australian Turntables have built a reputation of delivering great support and service backed up with the world's highest quality product. Contact us with your design and see how our team can help you.

A COMPANY & PRODUCT YOU CAN TRUST

Australian Turntables deliver products that are robust, reliable and built for a range of industries and environments. We also supply turntables at any diameter that can accommodate hundreds of tonnes or multiple vehicles. Reliability is key and at Australian Turntables we pride ourselves on doing things the right way, the Aussie way, by producing products that are built to last.

We work with you from the concept design stage all the way through to supporting your team in engineering, safety, standards, specifications and construction. Our team will work with you to create the optimal solution and gain maximum benefit for your space, delivering the world's best turntable system.

CASE STUDY

ALDI WENTWORTHVILLE NSW

Architect: Conrad Gargett

Project Completion: 2016

Australian Turntables contribution: 12.5 metre truck turntable

Conrad Gargett are a 130 year old architectural firm who work with Aldi Supermarkets on their development requirements. For this project, Aldi had an operating store that had an opportunity to increase revenue if more retail space could be made available.

The existing loading dock and back of house was recognised as the best area to optimise and due to Australian Turntables being a nominated supplier of Aldi, we were engaged to support the design team.

Aldi Wentworthville deliveries are serviced by up to 12.5 metre rigid trucks so we used a turntable of the same diameter and designed the loading dock around the turntable with the minimum clearance possible. To ensure safety was not compromised we also designed and supplied a vehicle positioning and anti collision system that made sure the vehicle was positioned correctly, and stopped the turntable in case a person entered the rotation zone.

This project, built around the turntable gained an extra 470m² of retail space for the Client which provided a return of investment within months and has generated increased revenue ongoing.

Testimonial,

"Australian Turntables has been on coles approved supplier list for many years, and with their help we have developed a detailed specification that has become a reference for developers and builders on complex mixed-use projects. Dealing with Australian Turntables, taught me that the product is more than just a turntable, but rather it is a whole package of durability, craftsmanship, and details. Recent projects with Australian Turntables was St Leonards, where Australian Turntables was involved in safety and risk management workshop meetings, between Coles and the developer (JQZ). The proposed solutions by Australian Turntables, from sensors, monitors, cameras, and traffic lights, have been integrated in the plan of management of a complex loading dock usage, that will cater for Big Coles Supermarket and Liquorland, Speciality retail shops, Public Library, and 3 Residential towers. I am very confident to nominate Australian Turntable to any project, as I know they will deliver with high integrity, and professionalism."

Yours sincerely

Alan Mhanna

SAFETY

At Australian Turntables, we want you to live life looking through the windscreen, not the rear view mirror. That's why we work to inspire you by creating the most practical and straightforward solutions possible. For us, it's simple, there's only one direction forward.

Reversing is not only less efficient, causing delays and loss of time, it can also be fraught with danger, for drivers, work sites, staff, pedestrians and cyclists. After all, life moves forward, not backwards.

Why choose backwards? Shift your perspective, turn around to find the better way.

At Australian Turntables, we take safety very seriously. Our platforms are not only designed to optimise space and create efficiencies, they also provide greater safety for our users by preventing accidents and high risk situations often caused by reversing manoeuvres due to lack of visibility, coordination, or control.

LOADING DOCK TURNTABLE

With our turntables, safety is paramount and offers these benefits:

Eliminate reversing incidents

You're safer with Australian Turntables. Thanks to our reliable and robust construction with rotating capacity, drivers can always position the vehicle without blind spots, so they don't miss what, or who is around them. Our system allows drivers to load and unload more efficiently, providing a safer way to position trucks, helping to eliminate workplace reversing hazards.

Safer entry and exit

Our turntables make life easier for truck drivers by eliminating potential hazards. In the design phase, we work tirelessly to guarantee clear visibility, making the process of driving in and out of our turntables safe and easy. We simplify the path design, to make it not only safer for your workplace, but more efficient.

LOADING DOCK TURNTABLE

Safety compliance and extras

Safety is our priority, and that's why our turntables comply with **Machinery Safety Compliance AS4024**. We can install anti collision systems to make sure vehicles in your loading dock are positioned correctly and stop the turntable in the event that a worker enters the loading dock. We can also provide you with site specific safety assessments and a number of optional extras to help increase safety including:

1. Exclusion zones automatic cut off
2. Sensors
3. Mirrors
4. Traffic Lights

Looking after your number one investment people

We focus on improving visibility by providing a solution that allows users to have a clear frontal view of the entire space, so they can see exactly what and who is around them. At Australian Turntables, we keep employees and the public safe from reversing trucks, by using low speed turntables and eliminate the risk factor associated with reversing onto loading docks. Our turntables are designed to prevent accidents protecting lives by enhancing your vision.

KEY BENEFITS OF LOADING DOCK TURNTABLES

OUR CUSTOMERS

We set our standards high, to ensure that we can meet the expectations of our customers. We design and manufacture our products to comply with all aspects of the Safety of machinery standards (AS 4024), we dare you to compare our solution with any others.

Our guarantee is that we won't compromise on quality and safety, ensuring that our solutions provide the best outcome for our customers over the long term. We also stand behind our products, with excellent customer service teams available throughout the project and well beyond. With our after-sales service, putting us ahead of the competition. Our professional teams are there to make your life easier and deliver a great result for the customer.

Our customers have recognised the need to specify our products in their projects, to get the right quality, safety compliance and reliability, whilst supporting the Australian Manufacturing industry.

Specify us for your next project, you won't be disappointed.
